Earthquakes, heart disease, cancer and diabetes: an update on research using Stats NZ's Integrated Data Infrastructure (IDI)

Virtual Health Information Network and the Healthier Lives National Science Challenge

Andrea Teng, George Disney, Naomi Brewer, June Atkinson

Chair: Professor Tony Blakely

Introducing the Virtual Health Information Network (vhin.co.nz) - a network for sharing and collaboration among researchers using health data, this talk will draw on learnings from Healthier Lives research done in Stats NZ's Integrated Data Infrastructure, a large research database of linked microdata about people and households. We will talk about the impact of Canterbury earthquake damage on heart disease and give an early update on studies examining cancer prevalence, productivity costs of heart disease and protective factors against the progression of pre-diabetes to diabetes.

Friday 21 April 2017 12.30 to 1.15

Small Lecture Theatre, Level D, University of Otago Wellington

To join by web-conference go to: https://connect.otago.ac.nz/ph_seminar/
