Nursing+

Nursing+ is part of McMaster Plus, a database produced by the McMaster Health Knowledge Refinery, at McMaster University in Canada, the home of evidence-based practice. Recent articles are selected and appraised for scientific strength, then rated for newsworthiness and relevance. The database is searchable, and you can register to receive alerts in your preferred areas.

The Hidden Worlds of the National Parks

If a video tour of a number of American national parks interests you, then this is the site for you. Select your park, then take a virtual tour with a park ranger. There are many things to see, including the rate of glacial melting over 12 years in the Kenai Fjords in Alaska, or some northern hemisphere constellations and stars from the Bryce Canyon National Park in Utah. This website recently won a Webby Award for the best educational site, and it’s easy to see why. (The website advises you to use headphones for ‘the best adventure’.)
