

Immunotherapy@Brisbane

24-26 November

Brisbane Convention and Exhibition Centre, Brisbane, Australia

2015

This conference will have a major focus on the translation of basic research to the clinic. A number of sessions focusing on clinical application and novel immunotherapeutics for cancer, infectious diseases, autoimmune disorders, transplantation, inflammation, immune deficiency, infectious disease and general immunology are planned. In addition, information sessions for the public on newly emerging immunotherapy technologies will also be held during the conference. We look forward to strong interaction between basic scientists and clinical experts.
