## Medical Education Research conducted by staff at Otago Medical School by research theme

The purpose of this document is to support staff and students throughout Otago Medical School (OMS) with networking and collaboration in conducting medical/health professional education research. It will also be useful for international researchers to engage with OMS staff on projects of a similar interest.

The process of how the themes and categories were derived, how researchers were allocated, and how to edit where researchers are allocated in each category is available on the medical education website [here](#).

Themes, theme descriptions, and categories:

**Assessment** - *Research related to assessment*

**Curriculum** - *Research focused on curriculum*

**Education Management** - *Research related to the institutional management of medical/health professional education*

**Learning Outcomes** - *Research related to what students are learning in a particular context*

**Research in Medical Education** - *Research related to process and outputs of doing research itself (e.g. methodologies, publication)*

**Students/Trainees** - *Research focused on the student*

**Teachers/Trainers** - *Research focused on the teacher*

**Teaching & Learning** - *Research related to teaching and learning modalities, processes and contexts.*
