

VIDARIS NEWSLETTER

We are very close to having everyone complete 12 months, a significant milestone, especially given the extraordinary events of September and February. We are on track with the last participants due to finish the study by the end of November. We would like to thank you all for your continued commitment and support.

As we move into our second winter we would like to remind you all that:

IF YOU HAVE COLD OR FLU SYMPTOMS - PLEASE LET US KNOW

If you experience symptoms of a runny nose, nasal stuffiness, sore throat or cough please contact us, no matter how mild or insignificant the symptoms may seem. It is very important that we are able to record all cold or flu-like illness. If you develop symptoms during the weekends or holidays or "inconvenient times" still contact us as soon as possible either by phone (0800 VIDARIS; 0800 8432 747) or send an e-mail to your project assistant (Kelly, Karina, Sarah or Penelope). We check our messages often and we will then contact you as soon as we can and discuss a convenient time and place where we can meet. If you are out of town we can e-mail you the forms to fill in or even go through the forms over the phone.

HOW TO CONTACT US

Karina Barney 378 6542;
e-mail: karina.barney@otago.ac.nz

Penelope Fleming 378 6543
e-mail: Penelope.fleming@otago.ac.nz

Sarah Godfrey 378 6546
e-mail: sarah.godfrey@otago.ac.nz

Kelly Watson 378 6545
e-mail: Kelly.watson@otago.ac.nz

Study Co-ordinator: Sandy Slow
