An Interprofessional Approach to Discharge Planning

**The Centre for Interprofessional Education,
University of Otago presents:**

An Interprofessional Approach to Discharge Planning

The IPE Discharge Planning activity, offered on the Christchurch campus of the University of Otago, brings together participants from five health professional groups in a simulation session, to support the development of a collaborative-ready workforce. The session models how interprofessional discharge planning starts at admission for complicated patients and – if done well – reduces errors and re-admission rates. Using video illustration, this session will describe the origins of the activity, as well as challenges, developments and improvements, and how it has aligned with regulatory requirements for competency-based IPE. This webinar should appeal to anyone interested in simulation-based and interprofessional education, and their role in preparing students for collaborative practice.

Presenters/ Panelist

- Dr Vanessa Stedman, Clinical Senior Lecturer, University of Otago (Christchurch) Simulation Centre
- John Dean, Clinical Skills Lecturer, University of Otago (Christchurch) Simulation Centre
- Tika Ormond, Clinical Educator in Speech-Language Pathology, University of Canterbury
