Climate change in Australasia: Challenges, Risks & Gaps?

Professor Lesley Hughes

Department of Biological Sciences
Macquarie University, Australia

This talk will cover the latest global and Australasian trends in observed and projected climate change, and identify the key risks these changes pose for Australia & New Zealand. The similarities and contrasts between how Australian and New Zealand scientists and policy makers are approaching potential future challenges will also be discussed and important research gaps highlighted.

Tuesday 18 September 2012
6.00pm
