

Vocational Rehabilitation

Are you an ACC Recovery Support Co-ordinator? Do you work on an ACC Vocational Rehabilitation Service contract? Boost your knowledge with our distance-taught paper:

REHB 706 Work Rehabilitation

Learn modern techniques for reducing workplace injuries and promoting early return to work.

REHB 706 can be taken as a single 30-point paper or combined with our core paper REHB 701 Rehabilitation Principles for a Postgraduate Certificate in Rehabilitation (PGCertRehab).

The certificate focuses on lifelong learning and creating a deep understanding and enthusiasm for work rehabilitation. Many of our graduates are successful managers or service providers in the work rehabilitation field.

The course is engaging, interactive and totally relevant. The multimedia, online workbook stimulates questioning and discussion with key sector leaders and health professionals through self-directed learning, blogs, webinars, discussion forums and experiential activities.

POSTGRADUATE

WELLINGTON

Tutor for REHB 706

Rob Griffiths is an occupational health physician who teaches REHB 706 for the RTRU. Rob works at the University of Otago, Wellington, as a Principal Clinical Adviser at ACC, and internationally as an academic in several centres in the US as well as being a private consultant.
