

THINKING ABOUT ADDING A MINOR?

A Minor in Science Communication bridges the gap between science and the humanities

As science, technology, and medicine become an increasingly important part of society, there is a push to make science public, to engage the public in on-going research, and to enable the public to engage with science, technology, and medicine. Include a Minor in Science Communication, become workplace ready, and stand out by bridging scientific and humanities areas in the present as well as the past.

Required Papers

- MFCO 103 Introduction to Communication Studies
- SCOM 209 Science Communication: An Introduction
- MFCO 222 Science, Technology and Society
- SCOM 301 Science and the Public
