The Making of the British Landscape

<http://bureau.maps.arcgis.com/apps/Cascade/index.html?appid=7d6d7322131d4abba4e120b8613b8fa3>

For those of you with an interest in geology and physical geography, this innovative and beautiful website is well worth a look. It takes the form of a story map that follows the geological history of Britain from 12,000 years ago to the present. To move through the story map, just scroll through slowly, and you'll see photos, maps and written commentary. The site does take a while to download, but it is well worth the wait.
