Admissions Statistics 2026

BACHELOR OF MEDICINE AND BACHELOR OF SURGERY (MB ChB)

APRIL 2026

Admission Statistics 2026

Bachelor of Medicine and Bachelor of Surgery (MB ChB)

Overview

This report provides historical summary statistics on admissions to the **2026 Bachelor of Medicine and Bachelor of Surgery (MB ChB)** programme and statistics for the previous four years: **2022, 2023, 2024 and 2025**.

Admission to the MB ChB programme is highly competitive, as illustrated in the table below. The number of places available to domestic students is capped by the New Zealand Government, and the number places available to international students is capped by the University.

Total number of applications & admissions to the 2022-2026 MB ChB programme					
Year	2022	2023	2024	2025	2026
Applications	1,003	928	960	943	1,141
Admissions	293	289	322	338	347

Admissions Policy for Health Sciences Professional Programmes

Working towards a more a culturally competent and equitable health workforce is a major priority for both the University of Otago and the Division of Health Sciences, of which the Faculty of Medicine is a part. A workforce that represents the communities it serves will improve health outcomes for all. The [Admissions Policy for Health Sciences Professional Programmes](#) promotes and facilitates equity for students from underrepresented priority groups: Māori, Pacific, rural, socioeconomic and refugee background. Other similar policies have existed in the admission years included in this report.

Guidelines for admission

Detailed information is available on the University of Otago's website about entry requirements for all Health Sciences professional programmes: [Guidelines for Admission](#). We encourage you to familiarise yourself with these guidelines if you are considering an application to second-year Medicine (the MB ChB programme) or any other Health Sciences professional programme. We also suggest reading the [Helpful Information](#) section below, before reading the tables in this report.

The information in this report is historical and not indicative of outcomes in future years. Outcomes will change from year to year reflecting changes in the admissions requirements and the attributes of the cohort of applicants in any year.

What is provided in this report?

The information and data contained in this report is for the 2022-2026 intake years for the MB ChB programme (second-year Medicine):

- ✓ [Number of applications](#)
- ✓ [Number of offers](#)
- ✓ [Range of academic scores of applicants to receive offers of admission](#)
- ✓ [Number of admissions](#)

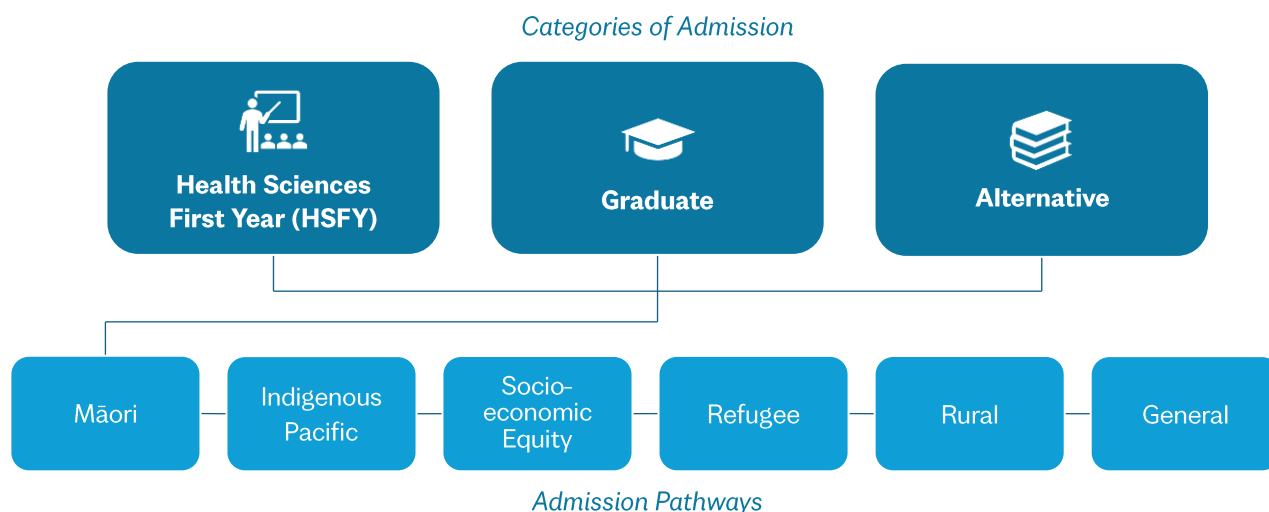

Looking for something else?

For any other information contact our AskOtago service via university@otago.ac.nz which can answer questions or arrange appointments with [Student Development](#) advisers.

Helpful Information

Admission categories and pathways

As outlined in the [Medicine: Guidelines for Admission](#) there are three **categories of admission** to the MB ChB programme and six **admission pathways** within each of the three categories:

International students

International students are students who require a student visa to study in New Zealand and are non-domestic students under the University's fee-paying categories. The total number of places for international students in the MB ChB programme is restricted.

Data limitations

The number of applications and admissions is sourced from the University's student management system, whereas the number of offers is sourced from other records. We endeavour to ensure the information in this report is accurate, however known data limitations exist, including for example:

- Applicants may apply under multiple admission pathways. An applicant admitted under the Māori pathway may also have been eligible to be admitted under the Rural pathway but will not be considered or counted towards admissions under the Rural pathway. This may cause discrepancies between reported numbers of applications, offers and admissions.
- Applicants gaining an offer of admission to the MB ChB programme via the Graduate or Alternative categories may be required to pass prescribed papers before being admitted to second year classes. This may cause discrepancies between reported numbers of offers and admissions.

Privacy

It is the University's standard practice not to provide information where it relates to fewer than five individuals. Where the numbers are very low, there is a risk that the identity of individuals could be determined or inferred, and that their personal information could be disclosed. Accordingly, where there are fewer than five individuals in a particular dataset, we have withheld the data and indicated using "<5" ("fewer than five"). We have also used "NA" ("not applicable") where no offers were made.

Scores

The **Health Sciences First Year (HSFY)** category uses 'average academic scores', which are calculated using a student's top seven paper scores across the year. This calculation can include one of the approved optional eighth papers if it is one of a student's top seven scores.

The **Graduate** category uses 'weighted GPA scores', which are calculated from the grades achieved in the qualifying degree, which is usually the first degree awarded to the applicant.

Alternative category assessments are holistic, and while academic record is an assessed factor, a formal score calculation is not made. Accordingly, there are no minimum scores for entry to the MB ChB programme via the Alternative category, including via the admission pathways.

Waiting list scores

Applicants may be offered a place from a waiting list any time right up to the time MB ChB programme classes begin. From 2024 data on average academic scores to gain an offer of admission has included non-waiting list and waiting list scores (if and where subsequent waiting list offers were made).

*The University defines "first-round" offers as offers of admission not received from the waiting list, or "**non-waiting list**" offers.*

Admission statistics for 2027

Admissions statistics for the 2027 MB ChB programme are expected to be finalised when all admissions processes are completed, which is usually at the end of March in the year of admission (i.e. March 2027) and will later be made publicly available.

Published grades

Anonymised statistical academic results data for papers offered by the University are published on our website at [Paper results](#) in accordance with the University's [Proactive Release Policy for Academic Results](#).

*The University does not publish grade distributions for **individual assessments** (e.g. progress tests). These form a subset of the overall anonymised statistical academic results data for completed papers.*

Number of applications

2022-2026 MB ChB programme

HSFY category broken down by pathway

Number of applications to the 2022-2026 MB ChB programme (HSFY)					
Pathway	2022	2023	2024	2025	2026
Māori	67	50	62	58	72
Indigenous Pacific	30	26	30	37	24
Socio-economic Equity	15	22	16	11	18
Refugee	14	14	14	13	19
Rural	81	34	40	60	67
General	307	269	307	317	379
International	24	23	67	43	79

Graduate category broken down by pathway

Number of applications to the 2022-2026 MB ChB programme (Graduate)					
Pathway	2022	2023	2024	2025	2026
Māori	34	30	26	16	22
