General

The published Hocken music collections encompass approximately 19,000 recorded items, as well as sheet music, books and periodicals. Our archives also include musical recordings on various formats, and related documents; from the records of musical groups, to the musical output of local (and locally-based) composers.

We have playback equipment available to hear material on 78rpm disc, LP and 45rpm discs, cassettes and CD, as well as to view DVD and videocassettes. For any requests on cassette and videocassette, we require 24 hours' notice, as the tapes require acclimatisation.

Collecting music at the Hocken started in earnest in 1977, though some recorded material (mostly New Zealand contemporary classical) and sheet music was acquired earlier. The goal was to collect all genres of music performed, or created, by New Zealand and Pacific musicians, and in the early 1980s this extended to collecting earlier material, sheet music, and music related books and periodicals, ephemera, and posters. Our collections continue to grow through purchases and donations, and are broad in range of artists, and genres.

All published music and related publications are searchable through Library Search|Ketu. Try a subject search using these terms:

- Sheep-shearing – New Zealand - songs and music
- Rock music – New Zealand – Dunedin
- Music – Polynesia – New Zealand
- Songs, Maori – New Zealand – texts
- Musical instruments – New Zealand

Material from Dunedin can be found by searching under artist or band name, recording title, or through title and author fields. Try a simple search, using the phrases

- “Dunedin Sound”
- Dunedin music

Results will list material in all libraries, and can be refined to only material held at Hocken by selecting 'Hocken' under the left hand column 'Library' field. Refine results further by type, where formats, including Audio Visual material, books, and periodicals, can be selected.

Recorded Music: formats

The music collections in the Hocken are spread over various mechanical, magnetic, and optical formats, both audio and visual.

Mechanical: we have material on mechanical formats such as 78rpm disc (shellac and vinyl), 12", 10", 8" and 7" vinyl, as well as examples of 16" transcription discs. 16" transcription discs cannot be played, as we do not have playback equipment for this format.

Magnetic: our magnetic formats are cassette, videocassette and reel-to-reel tape (though we do not have playback equipment for this format).

Optical: we also have optical formats, such as CDs (including CD-Rs and CD-RWs), and DVDs (including DVD-R and DVD-RW).

All sound recordings are available to find via Library Search|Ketu, by searching for the album, or song, title, or by searching the artist or band name (in the author field).

Music files

Our music collections are supplemented by music files – clippings from newspaper and magazine articles, features and columns. Most of these files are from 1970s to 1990s and they are arranged and grouped together by artist, label, institution or scene. The music files are not catalogued on Library Search|Ketu, or Hākena, but are listed on a spreadsheet, and are available to use – please ask at the Reference Desk to view files.
