

National perspectives on Geospatial Capability and Research

Geoff O'Malley, Principal Analyst – Geospatial Capability Building

The vision of Land Information New Zealand is that the power of 'Where' drives New Zealand's success. This aligns strongly with LINZ's commitment to the principles of the NZ Geospatial Strategy to improve the quality of, and access to, national geographic information.

This presentation will provide an update on how work related to geospatial capability and research undertaken by LINZ in collaboration with others is supporting delivery of this vision. The update will include:

- cross sector geospatial capability committee goals and related action items covering the school, tertiary and industry sectors to help grow national geospatial capability
- developments since the publication of the 'New Zealand Geospatial Research and Development Priorities and Opportunities 2016-2020' report that LINZ compiled in collaboration with the country's geospatial community.

12:00 noon, Thursday, 28 September 2017
