

VIDARIS NEWSLETTER

CHRISTMAS HOLIDAYS

The VIDARIS project assistants are making appointments in advance for December and January to accommodate the Christmas/New Year period. If you plan to be away during December and January can you let your project assistant know? There are various ways that scheduled monthly appointments at this time can be managed.

Sandy Slow, the VIDARIS Co-ordinator will be at the study rooms at 10 Oxford Tce on the 29th, 30th and 31st December to conduct some appointments. However, she will need to stay on site so there will be no

appointments at other locations, such as, PMH or Burwood during this time.

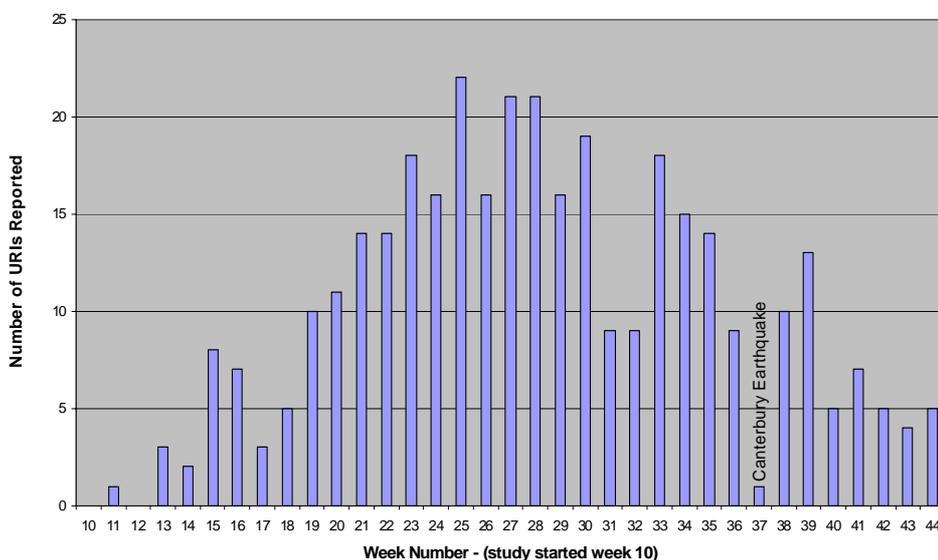

URI GRAPH

Below is a weekly breakdown of the number of cold and flu-like illnesses that have been reported to us since the beginning of the

study. As you can see we appear to be over the main cold and flu season for this year. We do however still anticipate that there will be further episodes, so if you get a cold or flu-like illness, please remember to contact us.
