

AQUAVAN

Discover our catchments and coastal connections

THE AQUAVAN...

is equipped with chilled, re-circulating seawater tanks specially designed to transport marine species.

DURING VISITS...

a mobile touch tank will support encounters with a diversity of live marine animals alongside other fun activities to show how the health of catchments, rivers, and coasts are all interconnected.

STUDENTS WILL PARTICIPATE IN...

fun and engaging hands-on activities to learn more about the impact we have on our coastal and freshwater environments, what is happening in our catchments, and how we can all look after our waterways.

OUR PROGRAMME...

is targeted at upper Primary and Intermediate level schools.
