

UNIVERSITY
of
OTAGO
Te Whare Wānanga o Otāgo
NEW ZEALAND

Department
of Botany

Botany is...

... field work, lab
experiments, ecology,
genetics, taxonomy and
conservation

With a degree in Botany, you'll gain a diverse set of skills that give you a range of job opportunities – our graduates work in conservation, agricultural research, teaching, corporate research, environmental monitoring, consulting, universities and more.

Otago offers NZ's only degree in Botany

The flora of subantarctic Campbell Island evolved in isolation from the mainland. In spite of notoriously bad weather, these large-flowered megaherbs attract pollinators by trapping heat in their flowers, keeping them warm on cold days.
