

Land information deficiencies and the development of the urban real estate market – case study of Ghana

Benjamin Quaye

PhD Candidate
School of Surveying

This presentation focuses on a comparative case study of the nature of the distinct socio-political organisational structures that underpin the land tenure arrangements in two urban areas in Ghana in order to understand how they impede or facilitate the management of the real estate information component of land registration systems.

12:00 noon, Thursday, 8 August 2013
