Lunchtime Seminar Series

Mapping New Zealand 2025

Seamlessly mapping New Zealand from the land to the sea

Graeme Blick, Chief Geodesist

Toitū Te Whenua Land Information New Zealand (LINZ)

Mapping NZ 2025 is LINZ's 10-year programme to deliver the mapping, data and expertise needed to address some of the most significant challenges facing NZ—such as climate change, urban growth and water. Our vision is seamless land and sea mapping, from Aoraki/Mount Cook to the edge of the continental shelf.

This presentation will update LINZ's progress and future plans on this ambitious programme of work. It will focus on our coastal mapping project, including the tools to integrate land and sea datasets.

Thursday 11th May 2023 (12pm – 1pm)

L1 Lecture Theatre | School of Surveying, 310 Castle Street
