The administrative and service Divisions are listed after the academic Divisions.

The year shown is that of taking up continuous appointment in the University, rather than the year of appointment to the position currently held.

## HISTORY AND GOVERNANCE

### HISTORY

The University of Otago, founded in 1869 by an ordinance of the Otago Provincial Council, is New Zealand's oldest university. The new University was given 100,000 acres of pastoral land as an endowment and authorised to grant degrees in Arts, Medicine, Law and Music.

The University opened in July 1871 with a staff of just three Professors, one to teach Classics and English Language and Literature, another having responsibility for Mathematics and Natural Philosophy, and the third to cover Mental and Moral Philosophy and Political Economy. The following year a Professor of Natural Science joined the staff. With a further endowment provided in 1872, the syllabus was widened and new lectureships established: lectures in Law started in 1873, and in 1875 courses began in Medicine. Lectures in Mining were given from 1872, and in 1878 a School of Mines was established.

The University was originally housed in a building (later the Stock Exchange) on the site of John Wickliffe House in Princes Street but it moved to its present site with the completion of the northern parts of the Clocktower and Geology buildings in 1878 and 1879.

The School of Dentistry was founded in 1907 and the School of Home Science (later Consumer and Applied Sciences) in 1911. Teaching in Accountancy and Commerce subjects began in 1912. Various new chairs and lectureships were established in the years between the two world wars, and in 1946 teaching began in the Faculty of Theology. The School of Physical Education was opened in 1947.

A federal University of New Zealand was established by statute in 1870 and became the examining and degree-granting body for all New Zealand university institutions until 1961. The University of Otago had conferred just one Bachelor of Arts degree, on Mr Alexander Watt Williamson, when in 1874 it became an affiliated college of the University of New Zealand.

In 1961 the University of New Zealand was disestablished, and the power to confer degrees was restored to the University of Otago by the University of Otago Amendment Act 1961.

Since 1961, when its roll was about 3,000, the University has expanded considerably (in 2009 there were about 21,000 students enrolled) and has broadened its range of qualifications to include undergraduate programmes in Surveying, Pharmacy, Medical Laboratory Science, Education, Physiotherapy, Applied Science, Dental Technology, Medical Radiation Therapy, Dental Hygiene and Dental Therapy (now combined in an Oral Health programme), and Biomedical Sciences, as well as specialised postgraduate programmes in a variety of disciplines.

Although the University's main campus is in Dunedin, it also has Health Sciences campuses in Christchurch (University of Otago, Christchurch) and Wellington (University of Otago, Wellington) (established in 1972 and 1977 respectively), and an information and teaching centre in central Auckland (1996).

The Dunedin College of Education merged with the University on 1 January 2007, and this added a further campus in Invercargill.

## GOVERNANCE

The supreme governing body of the University is the Council, presided over by the Chancellor. When it was first established its members held office for life. Its constitution was progressively amended in 1891, 1911 and 1946 to provide for the representation of certain local bodies and educational groups, the graduates, the student body and non-professorial staff. The present structure of the Council was laid down in the Education Amendment Act 1990.

The Council is advised on academic matters by the Senate, the membership of which is drawn mainly from the Heads of academic Departments, but with representatives of other teaching staff and students. The Vice-Chancellor was designated as Chief Executive of the University by the Education Amendment Act 1990 and he convenes the Senate, which, in turn, is advised by the Divisional Boards, and other Committees and Boards, on matters which fall within their particular terms of reference.

In 1989 the internal governance of the University was reformed by grouping the existing departments, faculties, and schools into four academic Divisions (Commerce, Health Sciences, Humanities, and Sciences). Each academic Division is headed by a Pro-Vice-Chancellor. Further changes to the executive group resulted in the appointment of two Deputy Vice-Chancellors in 1994 and of a Chief Operating Officer in 2005. A Pro-Vice-Chancellor (International) was appointed in 2006. There are also nine non-teaching Divisions: Academic, Research, Human Resources, Accommodation Services, Financial Services, Information Technology Services, Marketing and Communications, Property Services, and Student Services.

## COAT OF ARMS

The University's coat of arms was granted by the Lord Lyon King of Arms (Scotland's premier officer of arms) on 21 January 1948. Its design is based on that of the unauthorised arms which appeared on the University's seal in use by September 1870.

The blazon (technical description) of the arms is:

Azure, on a saltire cantoned between four mullets of six points  
Or, a book, gilt-edged and bound in a cover Gules charged with a  
mullet of six points of the second [i.e. Or] and a book-marker of  
the third [i.e. Gules] issuant from the page-foot, and in an Escrol  
under the same this Motto "SAPERE AUDE".

(Lyon Register vol.36, p.102)

In ordinary language, the shield is blue, with a gold saltire (Saint Andrew's cross) between four gold six-pointed stars. On the centre of the saltire there is a closed red book, gilt-edged and with a red book-marker protruding, bearing another gold six-pointed star on its cover.

The motto may be translated as 'dare to be wise' or 'have courage to be wise'.

The University does not accept responsibility for academic failure which can be attributed to a student's lack of competence in English.

- 3 The Senate may permit any candidate of exceptional ability to matriculate although the candidate has not attained the minimum age specified in regulation 1. Such a candidate may amend the age in the matriculation declaration.
- 4 A candidate wishing to enrol for a diploma or certificate that does not require a university entrance qualification may apply to enrol as a non-matriculated student. Separate application for enrolment into the particular programme is required and the entrance standards for the particular qualification need to be met.

*Note:* Currently, the University offers the following programmes that are open to non-matriculated students: Certificate in Foundation Studies, Certificate in University Preparation and the Diploma of Teaching.

- 5 Where a student wishes to be enrolled in more than one institution simultaneously, it is the responsibility of the student to ensure there are no clashes of lectures, tutorials or examinations. Students intending to seek credit towards a University of Otago programme on the basis of passes in one or more papers at another institution are strongly encouraged to obtain prior written confirmation from the University of Otago of the precise credit (if any) which will be granted.
- 6 Enrolment in the University or any particular paper or course may be declined or cancelled by the Vice-Chancellor for any of the following reasons:
  - (a) the person fails to satisfy any requirement or condition specified in regulations
  - (b) insufficiency of accommodation or of teachers in the paper or course for which the person wishes to enrol
  - (c) the person's academic record is such that he or she has been declined enrolment at this or another university
  - (d) evidence that information supplied in support of the person's application for admission or enrolment was untrue or misleading.

Those whose age is such that they do not meet the conditions specified in regulation 2(a) above may apply for Discretionary Entrance, but Discretionary Entrance will be granted only in accord with the following guidelines:

- (a) the University reserves the right to impose restrictions as to which courses an applicant may enter;
- (b) applicants seeking entry directly from Year 12 (sixth form) will be admitted only if in the opinion of the Senate a standard of attainment has been demonstrated which indicates a high degree of likelihood of success in the course to which admission is sought;
- (c) those who are not seeking entrance directly from the New Zealand secondary school system will be granted admission if there is evidence of ability to undertake the course to which admission is sought.

Prospective students enrolled for Year 13 study at a New Zealand secondary school beyond 1 June may not normally be admitted with Discretionary Entrance before the second semester of the following year. Prospective students may apply for Discretionary Entrance for the purposes of taking papers while still attending secondary school or for taking Summer School papers but will be required to withdraw from the University if they do not gain an entrance qualification in the January immediately following application. Such students may apply to be readmitted in the second semester or subsequently.

4 *Fee*

Every applicant for Special Admission or Discretionary Entrance must pay the prescribed fee if the application is successful.

*Notes:* (1) Any person wishing to apply for Discretionary Entrance must consult the University's Liaison Officer before submitting an application.

- (2) Applications must be submitted to the Manager, Admissions and Enrolment, by 10 December of the year before that in which the applicant wishes to enrol for Summer School, full year, or first semester papers; or by 1 June of the year in which the applicant wishes to enrol for second semester papers.

## DEFINITIONS

### *Points and Papers*

From 1992 most degrees and diplomas awarded by the University have been converted from a “unit” system to a “paper/points” system.

Every paper has a point value that indicates its contribution to the qualification enrolled for (or to any other qualification to which that paper can contribute). These values have been derived on the basis of an equivalent full-time year of enrolment being 120 points.

As a general guide, 1 point represents study in formal instruction or independent study for 10 hours. Some professional, honours and postgraduate programmes may differ from this.

From 1992 degrees and diplomas of the University of Otago have consisted of papers which yield points at various levels. Each paper is identified by a seven-character code: four letters indicate the subject of study (CHEM = Chemistry, MUSI = Music, etc.); three numerals indicate the paper and level of study (101 etc. = first level papers, 201 etc. = second level papers, and so on). The points assigned to each paper are specified in the appropriate Schedule for each degree or in the list of papers at the end of the Calendar.

### *Prerequisite, Corequisite, and Restricted Papers*

A “prerequisite” paper to a particular paper is a paper that must have been passed before the particular paper is taken.

A “prerequisite or corequisite” paper to a particular paper is a paper that must either have been passed before the particular paper is taken or be enrolled for concurrently with the particular paper.

A “restricted” paper relative to another paper is one for which a student cannot claim credit in his or her academic record together with the other paper, due to overlap of content.

### *Major*

The term “Major” is a shortened version of “Major subject”, meaning the subject taken to 300-level as the main area of study for an ordinary Bachelor’s degree.

A degree programme must include all the requirements for a major subject specified in Schedule A of the degree regulations. Typically, the papers which are required are in the subject concerned, or in related or supporting disciplines, and are worth at least 36 points at 100-level, 54 points at 200-level, and 72 points at 300-level.

A student’s academic record shows the name of the major subject in the degree.

### *Double Major*

The term “Double Major” refers to the situation where, within a Bachelor’s degree programme:

72 points are at 300-level for one subject; and

72 points are at 300-level for a second subject; and

the other major subject requirements for both subjects, as specified in Schedule A of the degree regulations, are satisfied.

A student’s academic record shows the names of the two major subjects in the degree.

### *Minor*

The term “Minor” is a shortened version of “Minor subject” and refers to a recognised selection of papers in a particular subject area which may be acknowledged on a student’s academic record in addition to a major subject.

Certain degrees may include papers which satisfy a Minor Subject Requirement, comprising papers worth at least 90 points from those specified for a Major Subject Requirement; at least 54 points must be above 100-level and of these at least 18 points must be above 200-level. No paper may count for both a Major and Minor Subject Requirement unless that paper is at 100- or 200-level and is specified as compulsory for both Requirements.

### *Double Degree*

The term “Double Degree” refers to the situation where the requirements of two complete degrees are satisfied. The two degrees may contain papers which are common to both in which case papers up to a specified number of points are “cross credited”. Where cross crediting is permitted the two degrees are completed in a shorter time than the usual total length of both degrees.

## **TRANSITIONAL PROVISIONS**

- 1 The University reserves the right to introduce such changes (including the addition, withdrawal, or restructuring of papers or programmes) as it may judge to be necessary or desirable. ## EXAMINATION REGULATIONS

### INTERNAL ASSESSMENT AND TERMS REQUIREMENTS

- 1 The final grade for most papers (not including dissertations, theses, or other research exercises) incorporates the results for formal examinations conducted under the authority of the Senate at the end of the teaching period concerned (final examinations). Additionally, or alternatively, some or all of the final grade is based on results for essays, assignments, laboratory or other practical work, and tests or examinations (sometimes known as terms tests) conducted by individual departments and schools (internal assessment).
- 2 Some departments require that students gain terms (i.e. fulfil certain specified conditions) before they may sit final examinations. Terms are gained by attending classes and by completing oral, written, and practical work to the satisfaction of the Head of Department. *Students must familiarise themselves with any Terms Requirements of the departments whose papers they are taking.*
- 3 (a) A student who has failed to pass a paper may apply for Final Examination Only enrolment. If the application is approved, the student is permitted to have internal assessment results and terms carried over in the paper and to sit the final examination again without attending any part of the course.  
*Note:* In some papers Final Examination Only enrolment is not normally available and students will be informed at the commencement of classes if it is not available.
  - (b) This concession may be granted only once in a particular paper.
  - (c) The examination must be attempted at the end of the semester or full year in which a paper is offered next, except that it may be attempted earlier if the paper concerned is offered in a summer school.
  - (d) A student who has been granted Final Examination Only enrolment in a paper may cancel the enrolment for that paper until 1 February for a summer school paper or 10 May for a first semester paper or 10 September for a second semester or full year paper. Later cancellations will be permitted only in exceptional circumstances.
- 4 Special Terms Requirements apply in some Health Sciences programmes whose regulations contain specific requirements.

- Notes:*
- (i) Application for Final Examination Only enrolment must be made on the prescribed form, available from the University's website or the University Information Centre, to the Head of Department concerned by 10 January for summer school papers, 1 March for full year and first semester papers, and 31 July for second semester papers. A fee will be charged if an application is approved.
  - (ii) Final Examination Only students may not attend any lectures, laboratories, or tutorials, or receive assistance from academic staff, or have access to electronic holdings of course material, or receive printed course material.
  - (iii) Final Examination Only enrolments are not taken into account in any consideration of a student's status as a full-time or part-time student.

- (a) For examination purposes:

Candidates must submit their theses for examination to the Doctoral and Scholarships Office (in the case of theses for the degree of Doctor of Philosophy or for professional doctorates), the Director, Graduate Research Services (in the case of other doctoral theses), or the Department or School concerned (in the case of all other theses). Four copies are required in the case of theses for the degree of Doctor of Philosophy, and three copies for all other theses (two copies are eventually retained permanently by the University and the others returned to the candidate). Theses should normally be submitted for examination in a temporary soft binding so that, if necessary, any required corrections can be made.

- (b) After examination:

The degree for which the thesis is required shall not be awarded until two permanently-bound copies and (from 2010) a digital copy of the thesis, corrected if necessary, have been submitted to the Doctoral and Scholarships Office (in the case of theses for the degree of Doctor of Philosophy or for professional doctorates), the Director, Graduate Research Services (in the case of other doctoral theses), or the Manager, Student Administration (in the case of all other theses).

*Notes:* (i) At least one permanently-bound copy and (from 2010) a digital copy of every thesis which is accepted for a degree shall be deposited in the University Library (or the Canterbury or Wellington Medical Library) and one permanently-bound copy in the

### 3 *Format of Theses and Physical Requirements*

- (a) Theses shall be in typescript on A4 size paper with a margin for binding of not less than 30mm. The size of paper may be varied only with the approval of the Head of Department concerned.

*Note:* Particulars of requirements of format, typing, citation, photocopying, binding, and digital submission are available in *Notes on the Preparation of Theses* produced by the University Library.

- (b) For doctoral degrees other than the degree of Doctor of Philosophy and professional doctorates, the thesis may consist of a printed book or books or of reprints suitably bound.
- (c) Except with the approval of the Head of Department concerned, such maps or other illustrative materials as may be submitted must be either bound with the thesis, or placed in a pocket inside the cover. Extra large or bulky material may be bound separately as an appendix. Where duplication of certain material presents difficulties, the Head of Department concerned may grant the candidate permission to submit fewer copies of that material.
- (d) Every copy of a thesis submitted must include an abstract, not exceeding 500 words, in a form suitable for publication.
- (e)
  - (i) Every copy of a thesis which is deposited in the University Library system must include a declaration signed by the candidate concerning access to the thesis.
  - (ii) Any endorsement of the declaration to restrict access to a thesis will be permitted only in certain circumstances and requires the permission of the Pro-Vice-Chancellor concerned (in the case of a thesis for a master's or Honours degree) or the Deputy Vice-Chancellor (Research and Enterprise) in consultation with the appropriate Pro-Vice-Chancellor (in the case of a doctoral thesis) (and after consultation with the Director (Enterprise), Research and Enterprise Office, where appropriate).

## TRAFFIC AND PARKING REGULATIONS

### 1 *General*

The Campus of the University of Otago has been planned and developed as a pedestrian precinct. These regulations are promulgated to maintain that concept and to give guidance to and regulate those who drive or ride on the Campus.

### 2 *Observance of Signs*

Drivers and riders shall at all times observe all markings and signs on the Campus. Those markings and signs which are similar to those used by the Ministry of Transport have the same meaning on the Campus as they do in any other public place.

### 3 *Right of Way of Pedestrians*

Wheeled traffic shall at all times and in all places on the Campus yield the right of way to pedestrians and may not be driven in areas prohibited to such traffic except where limited access is specifically authorised (see regulation 5).

Cycling is prohibited in the central areas of the North Campus designated as 'No Cycling' areas.

### 4 *Speed Limit*

No wheeled vehicle shall be driven at any time on the Campus in excess of 15 kilometres per hour. Wheeled traffic may never be driven or ridden at any speed or in a manner which might interfere with the safety of pedestrians. Cycles shall not be ridden at a speed exceeding walking pace in any areas in which they are permitted but which are intended primarily for use by pedestrians.

### 5 *Access of Motor Vehicles*

Access to the Campus shall be on those routes specifically designated. Apart from emergency situations or for maintenance work by authorised trade and service vehicles all wheeled traffic shall be confined to designated access ways.

### 6 *Parking*

No wheeled vehicles shall be parked in any area except those specifically designated according to the type of traffic.

### 7 *Tow-away Areas*

Any motor vehicle or bicycle parked other than in conformity with the markings and signs including any motor vehicle or bicycle parked in a designated parking area without authority may be removed without notice. Any motor vehicle or bicycle so removed may be recovered only upon the payment of all costs incurred in the initial removal of the vehicle or bicycle from its unauthorised position.

8 *Skateboarding*

In recognition of the potential damage to property, the hazard to other traffic and the disruption to study and teaching caused by the noise when skateboards are improperly used within the campus, all such use is prohibited. Improper use includes the practice of stunt and aerobatic manoeuvres, and excessive speed amongst pedestrians. The responsible use of skateboards and other wheeled machines for ordinary transport across campus is acceptable.

9 *University Campus Public Place*

The University of Otago is a public place and the provisions of the Transport Act and the Regulations made thereunder with regard to the rights, responsibilities and duties of persons using motor vehicles or bicycles or other wheeled vehicles including skateboards and scooters apply accordingly. Breaches of these Regulations are also breaches of rules of University conduct rendering an offender liable to a fine of up to \$100.

## USE OF PREMISES REGULATIONS

- 1 No student shall smoke during the course of any lecture or in any place in which smoking is forbidden by express notice or in any laboratory or seminar group.

Disobedience of such order or direction shall be deemed to be a breach of these regulations.
- 4 Heads of departments are authorised to control the use of the parts of the University premises used by their respective departments and may make reasonable rules or give reasonable orders or directions as to the use of such premises or of University property within them. Breach of such rules or disobedience of such orders or directions shall be deemed to be a breach of these regulations.
- 5
  - (a) Any student of the University who attends a function of the Otago Polytechnic shall while within the precincts of the Polytechnic be subject to the rules of the Polytechnic. A breach of any such rule shall be deemed to be a breach of these regulations and may be dealt with under them if, in the opinion of the person or tribunal dealing with the matter, the rule is one which it is reasonable to enforce against a student of the University.
  - (b) Any student who is not a resident of a particular affiliated residential college is, while within the precincts of any such college, subject to its rules. A breach of any such rule shall be deemed to be a breach of these regulations and may be dealt with under them if, in the opinion of the person or tribunal dealing with the matter, the rule is one which it is reasonable to enforce against a non-resident of the college concerned.

- 6 (a) No animal (with the exception of those used by departments for the purposes of teaching or research or guide dogs for the blind) may be taken into or on or allowed to remain in or on any University buildings or premises (including the University Union) except with the permission of the Director, Property Services, or his nominee. Permission is not required to bring an animal on to University land but any person or persons permitted to bring an animal into a University building or bringing one on to its land must keep such animal under proper control at all times.
  - (b) In the case of dogs such control must be exercised by means of a lead, leash or chain designed for the purpose and held firmly at all times by the person bringing it within the University precinct. A dog is not under proper control if tied, chained or otherwise affixed to any object within the University precinct.
  - (c) Any animal not under proper control or found in a building when no permission has been granted for it to be there may be removed at any time without notice and may be recovered only upon payment of the costs involved in its removal.
- 7 No bicycle, scooter or motor cycle may be taken into or on or allowed to remain in or on any University buildings or premises.

## NATURE OF THE DEGREE

The degree of Doctor of Philosophy is awarded on the basis of the submission of a thesis. The thesis should give evidence of the candidate's ability to carry out research, that the candidate has shown originality and independence, and that the candidate has made a significant contribution to knowledge in the particular field. It is expected that some of the work in the thesis would be worthy of publication. The research should be of a kind which a diligent and competent student might reasonably be expected to complete within three years of full-time study.

## 1 ADMISSION

- (a) Admission to the degree programme shall be subject to the approval of the Senate.

*Note:* Candidates must apply for admission to the degree programme on the prescribed form available from the Doctoral and Scholarships Office. Applications may be made at any time. Applications must be approved before the candidate begins the research work.

- (b) Every candidate must be a university graduate and produce evidence of ability to undertake research in the area of proposed study. Such evidence shall include:
  - (i) a Bachelor's degree with first or upper second class Honours or equivalent (including a research component); or
  - (ii) a Master's degree (including an appropriate research component); or
  - (iii) appropriate research experience.
- (c) A candidate for a Master's degree may apply to transfer to candidature for the degree of Doctor of Philosophy, and may have the date of admission backdated as is considered appropriate.
- (d) Initial admission to the degree programme shall normally be provisional, and shall be confirmed on receipt of a satisfactory progress report after no less than six months and no more than 12 months of full- or part-time study.
- (e) If admission to the degree programme is not confirmed, then either provisional admission may be extended for one period of up to six months or the candidate shall be required to withdraw or to enrol for another degree. If admission is not confirmed after a period of extension, the candidate shall be required to withdraw or to enrol for another degree.
- (f) Notwithstanding regulation 1(b) above, a Medical student who has completed a year of study for the degree of Bachelor of Medical Science with Honours but has not been awarded that degree may be accepted as a candidate for the degree of Doctor of Philosophy and have the date of admission backdated as is considered appropriate. Such a student's programme of study must be approved by both the Board of the Faculty of Medicine and the Graduate Research Committee.

## 2 FULL-TIME AND PART-TIME STUDY

- (a) A candidate may apply for admission on a full-time or part-time basis, but may, with approval, change that status at the start of any academic year.
- (b) Holders of Divisional Teaching Assistantships shall be deemed to be full-time candidates, and Assistant Research Fellows may also be so deemed.

*Notes:* (i) A full-time candidate shall count as 1 Equivalent Full-time Student (EFTS) per annum (also see Note (iv) below).

(ii) A part-time candidate shall count as 0.5 EFTS per annum.

(iii) Only full-time students shall be eligible for University of Otago Postgraduate Scholarships.

(iv) The University expects that full-time candidates will devote the majority of their working time to their studies. It is not recommended that full-time candidates accept employment for more than ten hours per week on average over a period of twelve months. When progress is significantly hampered by work exceeding this recommendation, the candidate may be required to reduce work commitments or change to part-time enrolment.

## 3 ADDITIONAL PAPERS

In certain cases a candidate may be required or allowed to take one or more prescribed papers in addition to the programme. No candidate may take any other paper or course additional to the programme without first obtaining the approval of the Senate, which must be satisfied that taking any such paper or course will not materially delay the completion of the candidate's research.

## 4 DURATION OF THE PROGRAMME

- (a) A candidate shall pursue a course of study and research under supervision for a period normally equivalent to 3 full-time years.

## EDUCATION

**Note:** These regulations should be read in conjunction with the General Regulations, particularly those concerned with Admission and Enrolment, Terms Requirements, and Examinations.

Prescriptions for papers are printed in the Guide to Enrolment.

### PROGRAMMES IN EDUCATION STUDIES AND TEACHER EDUCATION

In addition to the qualifications in this section, the University offers programmes in Education for the degrees of Bachelor of Arts, Bachelor of Arts with Honours, and Master of Arts, and for the Postgraduate Diploma in Arts Subjects. Details may be found in the Arts and Music section of the Calendar. Other relevant qualifications are the Postgraduate Diploma in Child Advocacy and the Postgraduate Certificate in Children's Issues (Arts and Music section) and the Postgraduate Diploma and Postgraduate Certificate in Tertiary Teaching (Interdivisional section).

#### Professional Standards and Criminal Offences

Students graduating with a preservice teacher education qualification are eligible to apply to the New Zealand Teachers Council for registration as teachers.

In view of the requirements of the New Zealand Teachers Council for the registration of teachers and the entitlement of schools, early childhood centres, and other education services participating in teacher education programmes to have confidence in the character and behaviour of College of Education students:

- (a) persons who are applying for enrolment in College of Education teacher education programmes must consent to verification from the New Zealand Police and Department of Courts that the applicant has no undeclared criminal charges or convictions;
- (b) depending on the nature and recency of the offending, an applicant for admission to a programme may be declined admission by the Selection Committee concerned on the grounds that the applicant is not of good character and/or has been guilty of misconduct (see Education Act 1989, Section 224(113) (a) and (b));
- (c) students who are enrolled in teacher education programmes offered by the College of Education must adhere to the professional standards required during the period of the teacher education programme and also must declare any charges or convictions for criminal offences;
- (d) any student charged with or convicted of a criminal offence during the period of a College of Education teacher education programme must inform the Associate Dean (Teacher Education) in writing within seven days of such charge or conviction (in the case of a student who is currently enrolled) or before registering for further study (in the case of a student who is not currently enrolled). A determination about the student's eligibility to continue to study towards the qualification will be made by the Dean of the College of Education on the recommendation of the Associate Dean (Teacher Education).

## 7 RECOGNITION OF PRIOR LEARNING

In certain cases it is possible for students to have prior non-credentialled learning (i.e. learning which has not been formally recognised with a qualification or other documented record) recognised for the purposes of admission to or credit towards a course or programme. The process of assessing and recording such learning is called Recognition of Prior Learning (RPL) and any credit granted is termed RPL credit. Credit for the following papers may be granted to a student on the basis of RPL assessment:

EDSU 106 Te Whiringa o Te Reo

EDSU 107 Tōku Ao, Tōku Tikanga, Tōku Oranga

- (e) To gain entry from university a candidate must pass a minimum of 108 points in one year at university at a level to be determined by the Physical Education Admissions Committee from year to year. Where more than 108 points are taken, selection will be based on the best results from 108 points.
- (f) To gain graduate entry, a candidate must have completed the requirements for a degree at a level to be determined by the Physical Education Admissions Committee from year to year.
- (g) Notwithstanding any of the above provisions, the Physical Education Admissions Committee shall have discretion to consider any applicant who, not having satisfied these regulations in a particular aspect, warrants admission to the Bachelor of Physical Education degree programme for exceptional reasons.

- Notes:**
- (1) An application for admission to the programme is required; this is separate from the enrolment process. Applications must be received on the prescribed form of application by the School of Physical Education no later than 1 October. Late applications will be considered only at the discretion of the Physical Education Admissions Committee.
  - (2) A candidate who is offered a place in the programme must hold a recognised qualification for entry to the University at the time of enrolment.

## 1 STRUCTURE OF THE PROGRAMME

Every programme of study

- (a) shall consist of papers worth not less than 480 points,
- (b) shall include papers, as approved by the Programme Director concerned, worth at least 72 points selected from Commerce Schedule C, of which not less than 18 points shall be at 300-level,
- (c) shall satisfy one of the Major Subject Requirements listed in Applied Science Schedule A,
- (d) may include one or more optional minor subjects which satisfy the Minor Subject Requirements listed in Applied Science Schedule A or in other schedules (subject to approval by Programme Director). No paper may count for both a Major and a Minor Subject Requirement or for more than one Minor Subject Requirement unless that paper is at 100- or 200-level and is specified as compulsory for both Requirements.

## 2 DURATION OF THE PROGRAMME

The programme may be taken by full-time candidates in four years.

## 3 PREREQUISITES, COREQUISITES AND RESTRICTIONS

### 1 ADMISSION TO THE PROGRAMME

- (a) Admission to Second Year Classes in Medicine is limited to 234 candidates who are eligible by virtue of citizenship or permanent residence in New Zealand (but see regulation 1(j)).
- (b) The Division of Health Sciences has delegated authority to the Medical Admissions Committee for selection of candidates to Second Year Classes in Medicine.
- (c) Candidates for admission will be considered in the following categories and at the following times:
  - (i) *Health Sciences First Year* — in the first year of university study at the University of Otago, for candidates who will have fulfilled the requirements of the first year course;
  - (ii) *Competitive Graduate* — within three years of the completion of the requirements of a first degree awarded by a university in New Zealand;
  - (iii) *Other* — at one subsequent time, which may be on completion of a second degree or other university qualification.

A candidate may apply once only in each of the three categories of this regulation.

- (d) Applications for admission to Second Year Classes in Medicine must be received at the Health Sciences Admissions Office on the prescribed form of application no later than the following dates, in the year preceding desired entry:
  - (i) from Other categories applicants, by 1 May
  - (ii) from Health Sciences First Year applicants, by 1 October
  - (iii) from Competitive Graduate applicants, by 1 October

*Note:* The application process is separate from the enrolment process.

- (e) To gain entry in the Health Sciences First Year category, a candidate must, in the first year of university study at the University of Otago, pass all the papers prescribed for the first year course at B grade or better. Candidates must also

have a valid Undergraduate Medicine and Health Sciences Admission Test (UMAT) result. Selection shall be based on the results achieved in the papers with a total of 126 points and in the UMAT. The academic grades shall contribute 66% of the score to be used for selection and the UMAT shall contribute 34%.

*Note:* All the papers prescribed for the University of Otago Health Sciences First Year course must be passed at B grade or better. If an additional optional paper from the approved list is taken, and provided all of the prescribed papers are passed at or above the required minimum standard, the results in the best seven papers will be counted for admission purposes.

- (f) To gain entry in the Competitive Graduate category, applicants must have completed, in the minimum academic time and within three years of the date of application, the requirements of a first degree awarded by a university in New Zealand at a level to be determined by the Medical Admissions Committee from year to year. Candidates considered for entry in the Competitive Graduate category must have valid UMAT results.
- (g) (i) To gain entry in the Other category, a candidate must meet one or more of the following criteria:
  - (a) be a graduate who does not fulfil the requirements of the first degree as described in regulation 1(f);
  - (b) have health-related professional experience and satisfy special criteria (see note);
  - (c) have health professional experience in mental health and satisfy special criteria (see note).

*Note:* Applicants seeking admission to Medicine with health-related professional experience (see (g)(i)(b) above) or with health professional experience in mental health (see (g)(i)(c) above) will be required to demonstrate academic and/or professional experience in the relevant field, to a standard acceptable to the Medical Admissions Committee, as part of the selection process. Candidates applying under regulation (g)(i)(c) above are expected to have an interest in pursuing a career in mental health after graduating in Medicine.
- (ii) A candidate in the Other category must have achieved at least a minimum academic standard to be determined by the Medical Admissions Committee from year to year in the course of study on which the application for admission is based. A candidate may be required to attend an interview.
- (h) The University of Otago supports the participation of the following peoples in the health workforce. Therefore, applicants in any category (see regulation 1(c)) may also be considered in one or both of the following sub categories:
  - (i) Māori.
  - (ii) New Zealand Resident Pacific Islander of Polynesian or Melanesian descent.

A candidate in either or both of these sub categories must have achieved at least a minimum academic standard to be determined by the Medical Admissions Committee from year to year in the course of study on which the application for admission is based.

- (i) Applicants in any category (see regulation 1(c)) who have had a rural New Zealand upbringing and/or education (see note) may seek admission under the New Zealand Rural Origins sub category. If successful these students may

be required to undertake one year of the medical course in a rural immersion programme. This year will not add to the overall length of the course.

*Note:* To qualify for the New Zealand Rural Origins sub category candidates must:

- (i) have undertaken a significant proportion of their pre-secondary education while living in a New Zealand rural area; or
- (ii) have spent at least three years at a secondary school in a New Zealand rural area; or
- (iii) have equivalent New Zealand rural experience.

A rural area includes those towns in New Zealand with a population of 20,000 persons or fewer.

- (j) Applicants who are classified as International Students must apply under the International Students sub category. In this sub category:
  - (a) The Medical Admissions Committee shall have discretion to offer additional places in second year classes to International students under arrangements which have been approved by the Faculty of Medicine.
  - (b) Candidates must have achieved a level of academic attainment to be determined by the Medical Admissions Committee and shall have completed all necessary prerequisites.

*Note:* Applicants seeking entry to Medicine in this sub category must be Health Sciences First Year or Competitive Graduate applicants only.

- (k) Candidates offered a place under the Competitive Graduate or Other categories may be required to satisfy academic bridging requirements or pass prerequisite papers, at a standard to be determined by the Medical Admissions Committee, before being admitted to second year classes.
- (l) Entry to the course shall be subject to candidates meeting a specified English language requirement prior to enrolment in any second year classes.

*Note:* Candidates for admission in the Health Sciences First Year and Competitive Graduate categories must have valid UMAT results, as defined by the Australian Council for Educational Research, which is responsible for the development and administration of UMAT.

## 2 STRUCTURE OF THE PROGRAMME

- (a) Every programme of study shall satisfy the requirements set out in the MB ChB Schedule.
- (b) All students undertaking a first year course for the purpose of gaining entry to Second Year classes in Medicine are required to obtain approval of their courses of study from a Health Sciences first year course adviser. A student pursuing a course leading to a Bachelor of Science or a Bachelor of Arts degree for the purpose of gaining entry to Medical School must obtain approval for that course from an Adviser of Studies for the particular degree concerned.

*Note:* For specific enquiries about entry to Medical School students should make an appointment with the Associate Dean for Admissions, c/o Admissions Office, Division of Health Sciences.

- (c) No student may take any paper additional to the programme without first obtaining the approval of the Dean of the Faculty of Medicine or the Dean of a School of Medicine.
- (d) In approved cases, the Medical degree may be combined in an integrated programme of study with the degree of Master of Dental Surgery in Oral and Maxillofacial Surgery or in Oral Medicine or with the degree of Doctor of Philosophy.

*Note:* For further information and details of the integrated programme requirements contact the Faculty Manager, Faculty of Medicine.

### 3 ADMISSION OF STUDENTS BY TRANSFER

Transfer of students to the Medical programme at the University of Otago from the Medical programme at the University of Auckland (and vice versa) is possible only at Trainee Intern (sixth year) level. Students will be admitted with the approval of the Faculty Board and provided that:

- (a) a one to one exchange of students can be arranged;
- (b) the student has achieved a standard of performance acceptable to the Faculty Board;
- (c) the Faculty Board is satisfied there are special reasons for the student to transfer;
- (d) the Faculty has sufficient resources and facilities to accept the student.

*Note:* Students transferring from Auckland will graduate with the Auckland MB ChB degrees and students transferring from Otago will graduate with the Otago MB ChB degrees.

### 4 DIVISION OF CLASS AFTER THIRD YEAR

Facilities for the teaching of the fourth, fifth and sixth years of the programme are provided in the Dunedin, Christchurch and Wellington Schools of Medicine. After completion of third year, the class will be divided and students allocated to one of the three schools for the remainder of their programme.

In dividing the class, account will be taken of each student's personal preference as far as possible. However, if the numbers of applicants for entry to any one of the clinical schools exceeds the number of places available, a ballot will be held to determine which students will be required to take a place in one of the other schools. Students will be allocated equally to the three schools. This includes international students who will be allocated equally among the three schools. Once class division has been finalised, exchanges between schools will be permitted only if there is a vacant place and with the approval of the Deans concerned.

*Note:* No transfer is possible between the Auckland and Otago Schools of Medicine at this stage in the programme.

### 5 TERMS

- (a) A candidate for the degrees of Bachelor of Medicine and Bachelor of Surgery must obtain terms for the corresponding year before being permitted to sit the final examinations for Second, Third, Fifth, or Sixth Year, or, in the case of a Fourth Year student, before being permitted to proceed to Fifth Year classes.
- (b) Terms will be awarded by Boards of Examinations for each year based on attendance, knowledge, professional attitudes and skills assessment, and on the overall performance of each student in all components of the course during the year. Concerns about performance with respect to any of these criteria during the year, which are supported by similar concerns raised in previous years, can contribute to a decision to deny terms.

*Note:* At the beginning of each year of the Medical programme, each department or the appropriate Board of Examinations will clearly indicate to students specific requirements for the award of terms.

- (c) Students who are refused terms will be required normally to repeat the year as a whole; in special circumstances, with the approval of the Board of

Examinations for the year concerned, they may be permitted to pursue a defined programme of work and, where appropriate, when terms have been awarded, to sit a special examination.

*Note:* In the event of absence through illness likely to be prejudicial to the granting of terms, students are advised to submit a medical certificate to the Dean of the appropriate School of Medicine.

## 6 EXAMINATIONS

- (a) Examinations, other than the Final Examination, shall be conducted by means of written questions and/or by oral and practical, including clinical, examinations. The examiners may also take account of the performance of the candidate during the course of instruction.
- (b) A candidate for the Final Examination must undertake an approved course of study including an approved elective.
- (c) The Sixth Year will be a Trainee Internship designed to introduce clinical responsibility for patients. It will include clinical attachments and an elective period. To pass the Final Examination a candidate shall normally obtain a passing assessment from each clinical attachment and from the elective period. The assessment will be made on performance of clinical and other work and may include oral and clinical examinations. In the event that a passing assessment is not obtained in one or more attachments a candidate will sit a final clinical examination conducted by examiners from more than one School of Medicine and will pass the Final Examination if, in the opinion of the Board of Examinations, a satisfactory overall performance has been achieved.
- (d) A candidate who has qualified for admission to any examination other than the Final Examination but has not sat, or, having sat, has not passed the whole of the examination, may be admitted to a special examination in the following January unless the Board of Examinations determines that a candidate who has not sat or who has failed shall be required to carry out an approved course before being readmitted to examination.

*Note:* Entries for special examinations must reach the Manager, Student Administration, by 10 January.

- (e) A candidate who has qualified for admission to the Final Examination, but has not sat, or, having sat, has not passed the whole of the examination, shall be required to carry out an approved course before being readmitted to examination.
- (f) On the recommendation of the Board of Examinations, candidates for any examination may be credited with a portion of that examination.
- (g) Candidates for examinations in Medicine, other than the First Year Examination, who, in the opinion of the Board of Examiners, have reached an exceptionally high standard in any subject shall be granted a pass with distinction in that subject.

## 7 WITHDRAWAL FROM THE PROGRAMME

- (a) A student who withdraws on or before 10 July in the year of admission to second year classes will be required to apply to the Medical Admissions

Committee for readmission and any such applications will be dealt with under the regulations governing admission to the programme.

- (b) A student who, at any later time, withdraws from the Medical programme is required to apply for readmission to the Board of the Faculty of Medicine not later than 1 June in the year prior to that for which readmission is sought.

## INFORMATION FOR POTENTIAL SECOND YEAR STUDENTS

### *First Aid Certificate*

All students who enter the second year of the MB ChB programme are required to furnish a certified copy of an appropriate current First Aid Certificate with their acceptance of an offer of a place in second year Medical classes. This Certificate should have been gained through a registered training organisation and meet at least NZQA Standard 6401 (e.g. the St John Community First Aid Certificate) but students are recommended to obtain a qualification which meets the higher NZQA Standard 6400 (e.g. the St John Workplace First Aid Certificate).

### *Immunisation Requirements*

All students who enter the second year of the MB ChB programme are required to provide evidence of their immune status for the following specific diseases before classes begin: hepatitis B, hepatitis C, measles, mumps, rubella and varicella (chickenpox). The evidence of immunity must be provided by a New Zealand registered medical practitioner. Failure to comply with these requirements will mean that students cannot proceed with clinical training and in the interests of patient and student safety no exceptions can be made. The status of students with respect to tuberculosis will be established during the second year of the programme prior to entering the hospital-based portion of the programme.

### *Cultural and Religious Issues*

All students must participate in laboratory, practical and clinical activities, including those that may be unusual in some cultures. In the medical programme, some aspects of the teaching will require individuals to practice certain techniques on each other and, for this, students may be required to partially undress and to experience some body contact with other students. Training occurs under close supervision and all students are required to participate, as it is essential for their acquisition of clinical skills.

Essential undergraduate training will require medical students to travel to placements outside the urban area, in the company of male and female classmates. There may be clinical attachments to outlying hospitals and rural general practices, and there is no provision for accompanying partners, escorts or chaperones.

Medical students will also be expected to participate fully in the clinical activities of their attached team including some after-hours duties, and weekend on-call responsibilities. In some circumstances final examinations will also be conducted on the weekend (Saturday) when hospital outpatient clinics are available.

### *Dress Requirements in Operating Theatres and Clinics*

Specifically, in disciplines such as surgery, medical students will be required to conform to standards of dress that meet the high levels of hygiene in operating theatres. Personal garments, such as headgear worn outside the theatre situation, must be replaced by alternative sterilised garments provided by the hospital to meet accepted standards of infection control and asepsis. Students must also adhere to the stringent protocols of scrubbing to involve hands and both forearms to at least elbow level. In some outpatient clinics a similar dress code and adherence to infection control may also apply. In the interests of patient safety there can be no exception to these strict protocols.

### *Medical Registration*

Before medical graduates can practice as doctors in New Zealand they must register with the Medical Council of New Zealand and complete one year of supervised practice in a hospital. These first year places are provided by the hospitals (DHBs). There are limited, if any, places available for international students who will normally complete registration requirements in their home country.

### *Cost of Equipment, Instruments and Books*

In addition to the course and other fees, the cost of pursuing the undergraduate Medical programme includes the purchase of essential equipment, instruments, prescribed textbooks, and some course-related travel. Particulars of the items required in Second Year will be supplied to all students selected for admission to Second Year classes. Advice concerning additional items will be given from time to time in lectures. Allowance should be made also for the laundering of laboratory coats, for name badges and deposits on keys and School equipment and for supplementary textbooks. An estimate of these costs is as follows:

Second Year	\$1400	Fourth Year	\$950
Third Year	\$800	Fifth Year	\$1500

Students may also be required to complete their third year clinical training at one of the School's three Clinical Centres.

In dividing the class, account will be taken of each student's personal preference as far as possible.
