

# DIFFERENT EXPOSURES

PARTICIPANTS WERE DIRECTLY AND INDIRECTLY EXPOSED TO ATTACKS

Participants had a wide range of exposure to the attacks. 17% had lost a family member in the attacks; 12% were survivors injured in the attacks; 19% were survivors present at the mosques but not injured; 35% were a family member of a survivor; and 39% from the wider Christchurch Muslim community. Some participants, 23% were in multiple exposure categories.
