

Connecting to UO_WIFI: Windows 10

What is UO_WIFI?

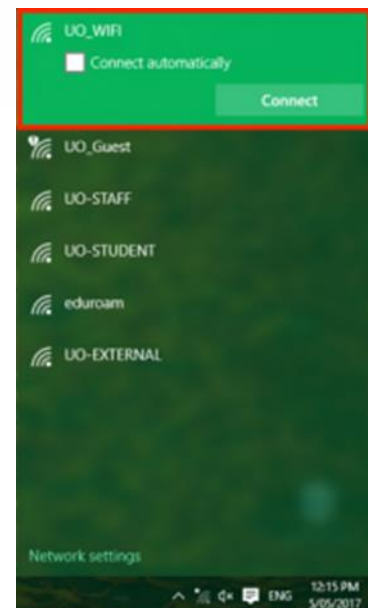

The University of Otago network is being upgraded, and UO_WIFI is the name of the new wireless network. The older networks (e.g., UO-STUDENT, UO-STAFF) will remain while the new network is being rolled out. Your device will switch between them if it has connected in the past.

Connecting to UO_WIFI

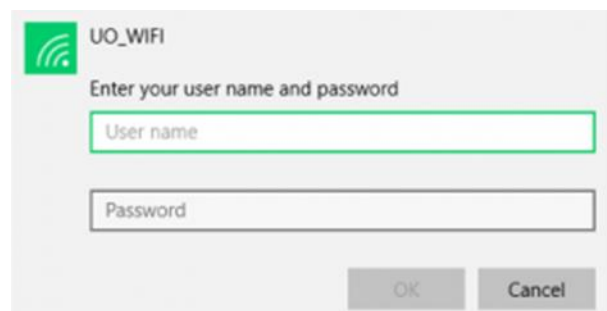

1. Click on the **Network** icon located in the taskbar (near the clock at the lower right-hand side), and a box will pop up showing a list of available wireless network connections.

2. Select **UO_WIFI** and click **Connect**, leaving the **Connect Automatically** box ticked.

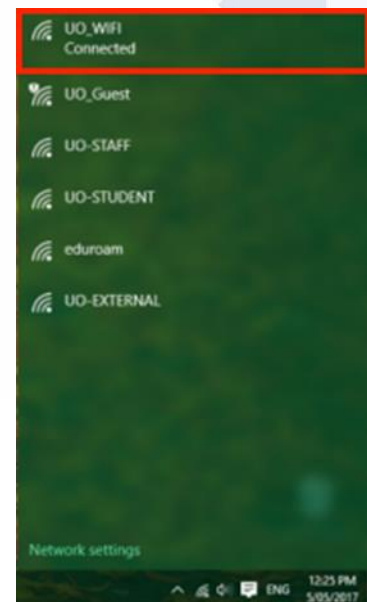

3. A **Network Authentication** prompt box will appear. Enter your University username (e.g. bonja22p) and associated password and click **OK**.

4. If prompted to Continue connecting?
Click **Connect**.

5. You should now be connected to the UO_WIFI wireless network.

Test your connection by opening your web browser and going to a University of Otago website and an external website, for example to <http://www.otago.ac.nz> and <http://www.bbc.com>

If you can't connect to the network?

- Students: contact Student IT on (479) 5170 or visit the Central Library, Dunedin campus
- Staff: contact AskOtago on (479) 7000 or 0800 80 80 98, or visit the AskOtago Central Hub, Information Services Building, Dunedin campus
