

Jamf enrolment configuration

Here's a complete list of configuration actions performed when a computer is enrolled in Jamf (as at April 2021):

default-loginscreen profile

- Change login window to show user and password fields instead of user icons
- Sets the University of Otago blurb below the login fields
University of Otago
If you have problems logging in please contact AskOtago on 0800 80 80 98 or email university@otago.ac.nz.

default-configuration profile

- Delay software updates by 7 days
- Install default fonts

configure-uowifi profile

- Configures UO_WIFI

configure-apps-access profile

- Allows access for apps to system or other apps they need access to:
 - Outlook Otago setup access to control Outlook and System Events
 - Endnote and Zotero access to control Word
 - Jamf access to control Adobe Digital Editions
 - Zoom access to control computer
 - VirtualBox access to control computer
 - VLC access to control computer
 - Sophos Endpoint to access all files
 - Parallels Desktop, FluxCenter to access user files
 - LogMeIn Rescue to connect techs to provide support
- Allows notifications for:
 - Jamf
 - Office apps
 - Sophos
 - Cisco Anyconnect VPN
 - Citrix Viewer
 - InformaCast desktop notifier
 - LogMeIn Rescue
 - Zoom
- Auto-approves kernel/system extensions for:
 - Elgato docks
 - Citrix
 - Cisco AnyConnect VPN
 - Sophos
 - Syncplicity
 - Parallels
 - VirtualBox
 - VMWare

- Zoom

configure-block-icloud-documents profile

- Blocks users from being able to sync Documents/Desktop folders with iCloud
NOTE: Doesn't apply to computers with iCloud Documents/Desktop sync turned on at time of Jamf enrolment

Exemptions:

- Computers that already have iCloud document sync turned on
- Computers that have been granted an exemption for this policy

configure-admin-itss policy

- Adds ITSS local admin user
- Enables access via SSH for the ITSS user only

configure-defaults policy

- Configures defaults
 - Desktop/Finder settings such as showing network drives on the desktop
 - Installs utilities for managing system
 - desktoppr
 - dockutil
 - InputSourceSelector
 - Otago Outlook setup utility
 - Enable automatic system updates
 - Enable Fast User Switching
 - Show admin info in login window
 - Disable extra warning when connecting to network shares
 - Allow non-admin users to manage WiFi and printer settings
 - Disable sending diagnostic and usage data to Apple
 - Energy settings (sleep after 20 minutes on battery power, never when on charge)
 - University of Otago webpage as the home page on all browsers (for new user accounts only)
 - Set region to NZ and make sure Māori keyboard layout is available
 - Installs a trigger to enable Jamf to trigger an immediate policy refresh
 - Enables Screen Sharing access for ITSS user only
 - Installs an Institutional FileVault key so ITSS can unlock FileVault disks without needing the user's password (doesn't enable FileVault, only kicks in if the user enables it)

configure-department policy

- Makes sure the department specified for the assigned user in AD exists in Jamf so the computer gets assigned to it

configure-firmwarepassword policy

- Sets a firmware password so by default computers cannot be started up from external disks, put into Target Disk Mode or restored to factory settings

Exemptions:

- Computers that have been granted an exemption for this policy

configure-netbiosd-disable policy

- 'netbiosd' is unnecessary, uses considerable processing resource, and is probably a bit too 'chatty' for the University network

configure-printers-CH policy

- Installs UO Print queue for Christchurch uniFLOW printers

configure-printers-DN policy

- Installs UO Print queue for Dunedin uniFLOW printers

configure-printers-WN policy

- Installs UO Print queue for Wellington uniFLOW printers

configure-user policy

- Removes Maps, Books, Photos, Siri from dock
- Adds Powerpoint, Excel, Word, Outlook, Firefox, Chrome, Safari, Software Centre and Downloads folder to dock
- Sets default home page to <https://www.otago.ac.nz/>

domain-registry policy

- Binds to the REGISTRY domain so users can log in using their staff/external usernames

install-auto policies

Policies that auto install the default applications. In general apps are only installed if they are not found already on the computer.

- Acrobat Reader DC
- Microsoft Office 365
- Sophos Endpoint
- Google Chrome
- Citrix Workspace
- Mozilla Firefox
- Microsoft OneDrive
- Microsoft Teams
- VLC video player
- Zoom
