BITX405 BIOETHICS IN CLINICAL PRACTICE

May be studied alone or used to count towards postgraduate qualifications in Bioethics or Health Sciences.
Focuses on ethical issues arising at the heart of clinical practice. Case studies will be used to explore the complexities involved in even seemingly straight-forward interactions with patients.

TOPICS INCLUDE
- Doctor-Patient Relationship
- Informed Consent
- Patients Unable to Consent
- Incompetent Colleagues
- Cultural Competence
- Boundaries: Sex, Gifts, Friendships
- Responding to Error

30 point paper; second semester
prerequisite: none
