

Concurrent Session 6A Value for money from falls prevention

Paul Scuffham is the Inaugural Professor of Health Economics at Griffith University. Since graduating from the University of Otago with a PhD in economics, his posts have included senior staff member at the prestigious York Health Economics Consortium in the UK. He has completed economic evaluations for pharmaceutical, biotechnology, and medical device companies; and government departments such as the UK Department of Health, the Australian Department of Health and Ageing, and PHARMAC in New Zealand.

Rebecca Mitchell is a registered psychologist who has been working in the area of injury prevention for over 15 years. She is a post doctoral research fellow at the University of NSW where her primary research interests include injury surveillance methods, epidemiological and evaluation studies, particularly in the areas of work-related injuries, water safety, and falls injury prevention.

Jennifer Davis completed her PhD training with a focus on health economic evaluation applied to the field of falls and fracture prevention in older adults at the Centre for Hip Health and Mobility. Jennifer is currently a post-doctoral fellow at the Centre for Clinical Epidemiology and Evaluation, University of British Columbia.

Tracy Comans undertook her undergraduate physiotherapy degree at the University of Queensland, and subsequently completed an economics degree with honours. Tracy has just completed her Ph.D. thesis where the primary focus of her research has been in developing different service models of rehabilitation for older people in the community.

Clare Robertson is a Research Associate Professor at the Dunedin School of Medicine. Her PhD included cost effectiveness analyses of the Otago Exercise Programme and psychotropic medication withdrawal. She is an author of 5 of the 10 published comprehensive economic evaluations carried out as part of falls prevention RCTs.
