

Give them something to do!

The role of the anatomy lab in interprofessional education

Bruce Wainman

Professor of Pathology and Molecular Medicine, and Director of the Education Programme in Anatomy, McMaster University, Ontario, Canada.

Jon Cornwall

Education Advisor, Centre for Early Learning in Medicine, Otago Medical School.

Sayers Boardroom, Sayers Building | University of Otago
Wednesday 20 November 2019 | 12:30-13:30pm

- The major challenge of IPE is to provide a meaningful and compelling educational opportunity for diverse interprofessional groups. A natural point of educational convergence is anatomy, since the body in health and illness is the unifying element of all health professional curricula. In the last 10 years, we have gathered extensive data showing that learning anatomy through whole body dissection in interprofessional groups provides a riveting activity with the right balance of education, discovery and interprofessional co-operation.
