

## What our recent graduates say

"The finance sector is notoriously hard to break into as a new graduate, and COVID has further amplified the situation. A University of Otago Master of Finance degree will set you apart when it comes to securing employment after graduation.

The Master of Finance gave me a skill set that better prepared me for the roles I now fulfil in the workplace. Time management, concise report writing, data analytics, modelling and presenting are all skills I learned during my postgraduate year that I have transferred to my day-to-day responsibilities.

I found the FINC 580 Research Project the most beneficial paper. This self-driven project helped me to learn and develop important research skills, and supported my transition from being a reactive learner to a proactive team member in my workplace."

**Hamish Kennett**  
Master of Finance Graduate  
Deals Edge Graduate at PwC

"As an international student, coming to the University of Otago to complete a Master of Finance was an amazing opportunity. I am now employed as a business analyst at a top securities firm in Vietnam, overseeing market requirements and determining stock/derivative management functions in trading applications. The MFinc provided me with the underlying theory and knowledge to undertake these tasks with confidence. Managing a large research project within a fixed time constraint, together with opportunities to present work and undertake quantitative analysis, were all valuable learning experiences that I have been able to use in my new role."

**Phuong Vu**  
Master of Finance Graduate  
Senior Business Analyst at Techcom Securities
