Setting up an eduroam wireless connection at another location using Windows 8

This section provides step-by-step instructions to configure your eduroam WLAN settings.

1. Once you are at the eduroam-participating location, move your cursor to the right of the screen until the Charms bar pops out and click on the **Settings** icon.

Click on your **wireless network icon** at the bottom right of your screen.

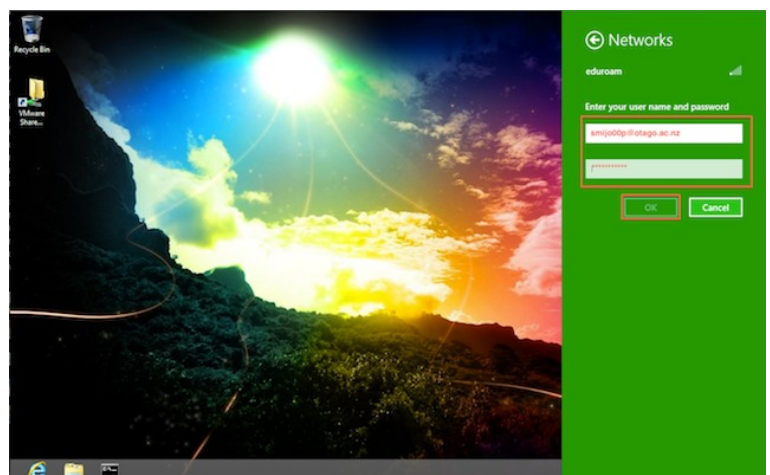

Select **eduroam** from the available wireless networks.

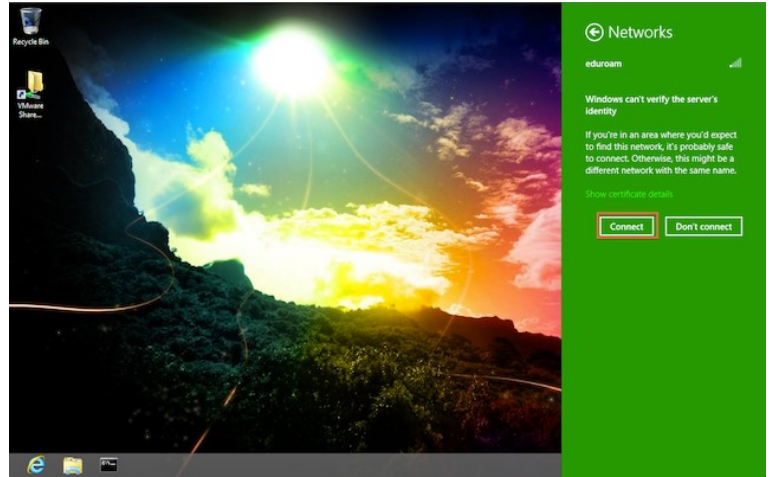

Check the **Connect automatically** box, then click **Connect**.

2. In the login box for the eduroam network, enter your University of Otago username (in the format <username>@otago.ac.nz) and password.

Click **OK**.

3. You will be prompted to verify the eduroam server's identity. Click on the **Show certificate details** link and if the server shows as **wlan.otago.ac.nz** you can accept the server identity authentication by clicking **Connect**.

4. Open your web browser and go to <http://www.otago.ac.nz> to confirm that you are connected to the eduroam network. If you cannot connect, please disable then re-enable your wireless. You will be asked for your University of Otago login credentials again.
