

SIMULCOURSE

ADVANCED

Brought to you by Otago Clinical Skills Laboratories
in partnership with 

Achieving excellence through hands-on clinical education

19-20
March
2019

An advanced, two-day workshop open to all health professionals who wish to integrate simulation into their education and quality improvement programs.

Participants will be provided with an advanced understanding on how to design, deliver and demonstrate the value of simulation-based education program. A focus on debriefing structure will help facilitators defuse difficult debriefing conversation and maximise the translation of educational objectives into clinical practice. Educators with no previous simulation experience are welcome to enrol.

This two-day course includes:

Simulation program design

- Integration into education & QA program
- Needs analysis, evaluation & demonstrating value

Scenario Design and Delivery

- Psychological safety and pre-briefing
- Practical scenario writing and modality selection

Debriefing

- Structure and conversational techniques
- Co-debriefing
- Difficult debriefing

Cost (Inclusive of GST)

Health Professional (RMO/RN/Paramedic)	\$1300
SMO single entry	\$1700
SMO discount entry for two	\$2500

Limited to 14 participants. Refreshments and lunch are included

Simulation Program Leadership

- Elevator pitches and demonstrating value
- Professional development in sim
- Simulation research and scholarship

Key Facilitators

Prof Victoria Brazil & Jesse Spurr
