## **Summer Studentship Project 2019-2020**

### **Project Three**

---

**Title of project: Formulation of blood-brain-barrier targeted nanocarriers**

**Supervisor: Dr Shakila Rizwan**

#### **Project description**

This project will involve work in a pharmaceutical science laboratory to develop new types of nanocarriers that are uniquely targeted to the blood-brain-barrier. Further details of the project will be discussed with the student after application.
