

Geospatial Opportunities at Land Information New Zealand

Pernilla Löfgren and Charlotte Dawson
Land Information New Zealand (LINZ)

Abstract: The work across LINZ's Location Information group is varied and technically abundant. The group consists of the Geodetic, Hydrographic, Topography & Addressing and Data Services teams. A significant portion of our work involves collaboration across team boundaries and includes a variety of skills. This session will discuss the type of spatial and analytical work currently ongoing, our development of key skill sets and some of the challenges we face as geospatial experts. This talk will also include details about the Summer Internships coming up in each of the teams within Location Information.

1:00 pm, Thursday 8 September 2016
