University of Otago, Wellington | 23A Mein Street | Newtown | Wellington

The end of modern medicine?

Siouxie Wiles, Associate Professor, Faculty of Medical and Health Sciences, University of Auckland

Antibiotics have been instrumental in the development of many of the modern surgeries and medical treatments we now take for granted. For years, experts have warned that we are using antibiotics unwisely, enabling antibiotic-resistant bacteria to thrive. What does this mean for us here in Aotearoa New Zealand?

Dr Siouxie Wiles is an Associate Professor at the University of Auckland. She has won numerous prizes for her research and science communication efforts and was one of three finalists for the 2018 Kiwibank New Zealander of Year award. Siouxie recently published her first book, 'Antibiotic resistance: the end of modern medicine?'

Friday 6 July 2018, 12.30pm to 1.15pm

Small Lecture Theatre, Level D, University of Otago Wellington
